The Mediterranean Sea We Need for the Future We Want

Regional Workshops for the UN Decade of Ocean Science for Sustainable Development 2021-2030

Venice, UNESCO-IOC, 21-23 January 2020

The UN Decade of Ocean Science for Sustainable Development 2021-2030 offers the ocean community a once-in-a-life-time opportunity to join efforts, mobilize resources, create partnerships and engage governments and other stakeholders in moving towards the Ocean We Need for the Future We Want. Our vision is that the Decade provides for the ocean community and beyond, a pathway to work collaboratively, demonstrating the productivity and relevance of the global science community for addressing societal issues, as well as raising the visibility of these collective actions. This increased visibility shall reach the global public and inspire learning and science-based decision-making and increase citizen ocean literacy

A key aim of the Regional Meeting is to define and address regional issues and science questions to contribute to the development of the Implementation Plan of UN Decade in order to take into consideration the regional emerging environmental and ecosystem developments, new policy requirements, latest scientific and data advances, technological breakthroughs and evolving societal demands. These can be further defined during the Preparation Phase and beyond.

The regional meeting is an integral part of the Decade design process and it is supported by the BlueMed Initiative. It will provide a forum to engage multi-disciplinary stakeholders and provide inputs to the development of the Implementation Plan of the Decade. This workshop, targeting specifically the Mediterranean region, will deliver through the work of six specific working groups will aim to identify concrete deliverables and partnerships to meet the Decade's six societal objectives interpreted by declining them in the perspective of the Mediterranean Sea uniqueness.

Day 2: Wednesday, 22 January 2020	
Parallel Sessions	
<p>09.00- 10.30</p>	<p>Working Group VI: A transparent & accessible Mediterranean Sea</p> <p><i>A transparent and accessible ocean whereby all nations, stakeholders and citizens have access to ocean data and information, technologies and have the capacities to inform their decisions.</i></p> <p>Maximize the sharing of knowledge about the health, evolution and functioning of Mediterranean marine environment; understand the future links with economy and societal needs by ensuring the complete openness of scientific knowledge in order to support the formulation of environmental policy and management plans, unlocking ideas and innovation. Improve the "Mediterranean Sea literacy" and participatory research.</p>
	<p>Co-Conveners: Alessandra Giorgetti, OGS & IODE Sergey Belov, IODE</p> <p>Panelists: Melita Mokos, EMSEA-MED Magdalena-Andreea Strachinescu, EC, DG-MARE Taco de Bruin, IODE & ODIS</p> <p>Projects' pitch: SeaDataCloud EmodNet</p> <p>Rapporteurs: Simona Simoncelli, INGV Giordano Giorgi, ISPRA</p>
	<p>Working Group IV: A safe Mediterranean Sea</p> <p><i>A safe ocean whereby human communities are protected from ocean hazards and where the safety of operations at sea and on the coast is ensured.</i></p> <p>Marine hazards such as storm surges, tsunamis, harmful algal blooms, or coastline erosion can be devastating for coastal communities. Foster the generation of dedicated research towards the definition of integrated multi-hazard early warning systems, to improve preparedness to emergencies, supporting plans for adaptation and mitigation to climate change in the Region thus reducing the coastal risks, safeguarding population and activities at sea.</p>
	<p>Co-Conveners: Stefano Lorito, INGV & NEAMTWS Esther Garcés, CSIC</p> <p>Panelists: Adriana Zingone, SZN Georg Umgieser, CNR Denis Chang Seng, IOC Andrey Babeyko, GFZ</p> <p>Projects' pitch: HAB STATUS REPORT & DATABASE DANUBIUS-RI ARISTOTLE & EPOS-ERIC GEBCO – Seabed2030</p> <p>Rapporteurs: Angela Pomaro, CNR Margarita Segou, BGS</p>
<p>10:30- 11:00</p>	<p>Coffee break</p>
