

## **75<sup>th</sup> Multibeam Sonar Training Course Bologna, Italy - May 21 to 26, 2018**

**Co-hosted by  
Istituto di Scienze Marine –  
Consiglio Nazionale delle Ricerche  
(ISMAR – CNR)**

- When:** From 0800H Monday May 21, 2018  
To 1600H Saturday May 26, 2018
- Where:** Room 215 & 216, Conference Centre, C.N.R., Bologna Research Area  
Via P. Gobetti, 101  
40129, Bologna, Italy  
[44°31'20.29"N 11°20'18.02"E]
- Cost:** The registration fee is \$3,800, which includes course materials and lunch for 6 days, but not accommodation.
- Accommodation:** The course venue is a short bus or taxi ride from the centre of Bologna and there are many hotels in the city. However, this is a busy time of year in Bologna and if you intend to attend the course it is recommended that you book your hotel soon. Some suggestions will be provided when participants register for the course.

*Course Description and Outline*

This six-day, 36-lecture course is designed to provide a theoretical and practical background in marine swath survey technology and techniques for hydrographic surveys, continental shelf boundary delimitation, offshore engineering, harbour dredging, fisheries habitat, route survey and scientific research, and provides overviews of:

- the technology and problems associated with shallow water multibeam surveys,
- processing and visualization techniques designed to address the complexities of swath mapping,
- constraints on using swath bathymetry to produce highest quality data.

<b>Day</b>	<b>Lecture</b>	<b>Topic</b>	<b>Instructor</b>	
Monday	<b>INTRODUCTION AND REVIEW OF FUNDAMENTAL CONCEPTS</b>			
	01	Historical Perspective and Course Overview	JHC	
	02	Underwater Acoustics A	TW	
	03	Oceanographic and Geologic Concepts	LM	
	04	Underwater Acoustics B	TW	
	05	Spatial Referencing Terms and Concepts	DW	
	06	Visualization Terms and Concepts	LM	
Tuesday	07	Hydrographic Performance Standards	DW	
	<b>SWATH SONAR ISSUES</b>			
	08	Sidescan Sonar Methods	JHC	
	09	Multibeam Sonar Methods	JHC	
	10	Bottom Detection Methods	TW	
	11	Sidescan / Multibeam Backscatter Imaging	TW	
	<b>ANCILLARY SENSOR ISSUES</b>			
	12	Multisensor Integration for Swath Bathymetric Systems	JHC	
	Wednesday	13	Sound Refraction in the Water Column	JHC
		14	Refraction Operational Limitations due to Watermass Variability	JHC
		15	Positioning Requirements: Horizontal, Vertical & Orientation	DW
16		Inertial and Acoustic Methods	IC	
17		GNSS Methods: Global Navigation Satellite Systems	DW	
18		Uncertainty Estimation in Swath Methods	LM	
Thursday	<b>SEABED ACOUSTIC BACKSCATTER</b>			
	19	Acoustic Seabed Interaction Theory	TW	
	20	Acoustic Backscatter Image Interpretation	JHC	
	21	Introduction to Seafloor Characterization	LM	
	22	Oblique Incidence Characterization Methods	LM	
	<b>SURVEY DESIGN AND QUALITY CONTROL</b>			
	23	Survey Design and Planning	LM	
24	The Patch Test and Sensor to Ship Reference Frame Alignment	JHC		
Friday	25	Field Quality Control: Dynamic Error Recognition and Analysis	JHC	
	26	Achieving Decimetre Bathymetry via Ellipsoid-Referenced Surveys	DW	
	<b>DATA PROCESSING</b>			
	27	Swath Bathymetry Data Cleaning – Interactive and Automated	JHC	
	28	Data Reduction for Chart Compilation Purposes	JHC	
	29	The Swath Processing Pipeline	LM	
	30	Impact and Management of Dense Digital Bathymetry	DW	
	Saturday	<b>CURRENT &amp; FUTURE TECHNOLOGY</b>		
		31	Midwater Mapping	TW
		32	Alternative Approaches for High Density Bathymetric Data Collection	LM
33		MBES Specifications	TW	
34		Operational Field Trials: Assessing Performance	JHC	
35		New Data Presentation Methods	LM	
36		Course Roundup and Discussion on Emerging Issues	ALL

## Advance preparation by attendees

---

This course is very intensive and fast-paced. Attendees come from various backgrounds and some have found they benefited from some pre-reading for the course. There is no mandatory preparation but we recommend the resources listed below be consulted by those feeling the need for such preparation.

Attendees at previous courses recommended that we provide access to some course materials in advance of the course. Hence, a download link is included in the receipt for payment of course fees, for binder 1 of 3 (we recommend looking at the first 7 lectures in particular). Printed copies will still be provided at the course.

### Available at no cost:

International Hydrographic Organization Publication C-13 *Manual on Hydrography* (2005, corrected Feb 2011), particularly chapters 2, 3, 4 and 7  
[http://www.iho.int/iho\\_pubs/CB/C13\\_Index.htm](http://www.iho.int/iho_pubs/CB/C13_Index.htm)

International Hydrographic Organization Special Publication S-44 *IHO Standards for Hydrographic Surveys*, 5th Edition, February 2008  
[http://www.iho.int/iho\\_pubs/standard/S-44\\_5E.pdf](http://www.iho.int/iho_pubs/standard/S-44_5E.pdf)

L3 Seabeam's *Multibeam Sonar Theory of Operations Manual* (2000) at  
<http://www.mbari.org/data/mbsystem/sonarfunction/SeaBeamMultibeamTheoryOperation.pdf>

US Army Corps of Engineers *Hydrographic Engineer Manual* (2013-11-30) particularly chapters 3, 6 and 7, and appendices D and F (example projects appendices H to Q). download at  
[http://www.publications.usace.army.mil/Portals/76/Publications/EngineerManuals/EM\\_1110-2-1003.pdf](http://www.publications.usace.army.mil/Portals/76/Publications/EngineerManuals/EM_1110-2-1003.pdf)

de Jong, Lachapelle, Skone & Elema (2003) *Hydrography* Second Edition, e-book with corrections (2010) 354 pp. ISBN: 90-407-2359-1. Particularly Chapter 11 *Sounding Methods*. Free download from
