The BlueS_Med and BlueNIGHTs projects: bringing Ocean literacy to schools and society

Francesca Alvisi

CNR-ISMAR

Breve riassunto

The BlueS_Med project partners, school teachers and pupils will co-create projects to inspire action for the protection of the Mediterranean Sea, alongside local stakeholders. The main objective of BlueNIGHTs is to bring the many facets and faces of people working in ocean science & research to the general public of Europe by organizing a series of interconnected EU “Blue” Researchers Nights.

Both projects are an opportunity to demonstrate that the ocean can be a source of inspiration, an object of interest or study, and a field of inquiry for people with very different backgrounds, hobbies and passions, including science, history, technology, sociology, pedagogy, economics, art, design, etc.
